Technical Team Lead Job Description:

As a Technical Team Lead, you will play a crucial role in guiding and managing a team of developers. Your expertise will drive successful project execution, foster collaboration, and ensure technical excellence. Here are the key responsibilities and qualifications:

Responsibilities:

- Coding in Node.js and Vue.js for development.
- Coding in Python for backend services.
- Implement and maintain databases (MySQL, MariaDB, PostgreSQL, or Redis).
- Lead a team of developers, providing mentorship, guidance, and code reviews.
- Collaborate with cross-functional teams to design, build, and deploy APIs.
- Devops knowledge of linux servers, including administration and maintenance.
- Configure and optimize Apache, Nginx, and HAProxy.
- Oversee containerization using Docker.
- Familiarity with PHP and WordPress.
- Excellent knowledge of working on any of the public clouds AWS, GCP or Oracle Cloud Infrastructure.
- Understanding of Adtech and or Martech domain

Skills required:

- Candidate should be only from a product building company and not from the service industry.
- Experience in architecture of the products is required.
- Hands-on experience in coding.

Qualifications:

- Bachelor's degree in Computer Science or related field.
- Minimum 8 years of software development experience.
- Strong leadership skills and ability to motivate and mentor team members.
- Proficiency in Agile methodologies and project management tools.
